macy warner

SINGLE RELEASE "ANGELINE" (SEPT 20, 2019)

about the artist

Most of Macy Warner's music focuses on the struggles of the human condition, with the hope that listeners will be able to experience connection, embrace their weakness, and not feel so alone. After losing her father at age 10, dealing with the effects of unforgiving mental illness, and watching her family members rise and crash with the tides, in her teens Macy discovered the baritone ukulele as a vessel to let loose the pent up emotion she had been carrying with her. This unique instrument's emotional fortitude has proven to be the foundation necessary to uphold Macy's natural ability to disclose life's painful, unspoken truths as she grips you with her goosebump-worthy melodies. Personal, and powerful, Macy Warner's music falls effortlessly into the darkest parts of your heart, filling them with golden light of understanding.

about the single

"This song is about one woman's struggle with the ugliest parts of addiction. From losing her friendships, to losing her family, she is left alone with no one to turn to, and can see no way out. This song is told from the perspective of the addiction, personifying the destructive disease, and giving the listener a different perspective on the topic."
- Macy Warner
